PROFESSIONAL SUMMARY

Laravel Full-Stack Developer with hands-on experience building secure, scalable, and maintainable web applications using Laravel, React, PostgreSQL, MySQL, and Docker. Experienced in designing RESTful APIs, implementing authentication and role-based authorization, and developing clean backend architecture using Laravel best practices. Passionate about solving real-world problems through software, writing clean and maintainable code, and continuously learning modern development practices. Strong interest in backend engineering, API development, scalable software architecture, and modern full-stack application development, with a commitment to building impactful software while continuously growing as a software engineer.

TECHNICAL SKILLS

Backend Development

- ❖ Laravel, PHP, RESTful API, JWT Authentication, MVC Architecture, Eloquent ORM, Middleware, Form Request & Validation, Service Layer

Frontend Development

- ❖ React, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap

Content Management System (CMS)

- ❖ WordPress (Theme Customization, Plugin Management, Website Development)

Databases

- ❖ PostgreSQL, MySQL, Database Design, Query Optimization, Relational Modeling

DevOps & Tools

- ❖ Git, GitHub, Docker, Composer, NPM, Postman

Experience

Laravel Backend Developer - Intern (Remote) November 2025 – February 2026

- ❖ Developed backend modules and RESTful APIs using Laravel following MVC architecture and clean coding principles.
- ❖ Built reusable CRUD features using Eloquent ORM, Form Requests, middleware, and service-layer architecture.
- ❖ Implemented authentication, authorization, and request validation to improve application security.
- ❖ Designed and optimized relational MySQL databases with efficient relationships and indexing.
- ❖ Diagnosed and resolved application issues through debugging and code reviews, improving overall system stability.
- ❖ Collaborated with senior developers using Git, pull requests, and peer code reviews while following professional development workflows.

Elite Org (Remote) May 2026 – July 2026

- ❖ Collaborated with cross-functional teams to develop and maintain web applications using Laravel, React, and WordPress.
- ❖ Assisted in developing backend features and RESTful APIs using Laravel while following MVC architecture and Laravel best practices.
- ❖ Built and enhanced responsive user interface components using React, delivering consistent user experience across devices.
- ❖ Customized and maintained WordPress websites through theme customization, plugin integration, and content management.
- ❖ Worked closely with senior developers and project supervisors, participating in feature development, code reviews, debugging, and technical discussions.
- ❖ Contributed to implementing new features, resolving bugs, and improving application performance across multiple client projects.
- ❖ Used Git and GitHub for version control, team collaboration, and source code management within an Agile development environment.

Projects

E-Commerce Website

Academic Team Project

Team Size: 3

Role: Backend Developer

Technologies: PHP, MySQL, JavaScript, Bootstrap, Git

Developed the backend of an e-commerce website supporting customer accounts, product management, shopping cart functionality, and order processing.

Key Contributions

- ❖ Designed and implemented the relational database structure.
- ❖ Developed shopping cart and checkout workflows with session management.
- ❖ Built an administrative dashboard for managing products and orders.
- ❖ Implemented secure authentication and server-side validation.
- ❖ Collaborated with team members using Git throughout the development lifecycle.

GitHub: <https://github.com/headlet/Ecommerce-Site>

Crowdfunding Platform

Technologies: Laravel, PHP, MySQL, Bootstrap, JavaScript, Git

Developed a crowdfunding platform that allows users to create fundraising campaigns and receive donations through an intuitive web interface.

Key Contributions

- ❖ Designed and implemented campaign creation, donation management, and contribution tracking features.
- ❖ Implemented secure user authentication and authorization using Laravel.
- ❖ Designed normalized MySQL database schemas for campaigns, users, and donations.
- ❖ Developed an administrative dashboard for campaign management.
- ❖ Created responsive user interfaces for both administrators and users.

GitHub: <https://github.com/headlet/CrowdFunding>

Job Portal

Elite Org Project

Technologies: React, JavaScript, HTML5, CSS3, Bootstrap, Git

Built a modern job portal that enables employers to post job vacancies and job seekers to browse and apply for opportunities.

Key Contributions

- ❖ Developed a responsive single-page application using React.

- ❖ Integrated Firebase Authentication for secure user login and registration.
- ❖ Utilized Firebase services for data management and application functionality.
- ❖ Implemented job listing, search, and application features.
- ❖ Built reusable React components to improve maintainability and code organization.
- ❖ Managed project development using Git and GitHub.

GitHub: <https://github.com/headlet/Job-Portal>

Business Website (WordPress)

Elite Org Project

Technologies: WordPress, HTML5, CSS3, JavaScript, Elementor, Plugins

Developed and customized a responsive business website using WordPress, focusing on performance, usability, and content management.

Key Contributions

- ❖ Customized WordPress themes to meet project requirements.
- ❖ Configured and integrated plugins to extend website functionality.
- ❖ Developed responsive pages optimized for desktop and mobile devices.
- ❖ Managed website content, navigation, and media assets through WordPress CMS.
- ❖ Applied PHP, HTML, CSS, and JavaScript for custom functionality and UI enhancements. Optimized website performance and user experience.

E-Commerce Platform

Personal Project | In Progress

Technologies: Laravel, React, PostgreSQL, Docker, JWT Authentication, RESTful APIs, Tailwind CSS, Git

Developed a full-stack e-commerce platform using a modern API-first architecture with Laravel as the backend and React as the frontend.

Key Contributions

- ❖ Designed and developed RESTful APIs using Laravel following clean architecture principles.
- ❖ Implemented JWT-based authentication and role-based authorization.
- ❖ Developed product, category, image, variant, cart, and user management modules.

- ❖ Designed and optimized a PostgreSQL database with normalized relationships.
- ❖ Integrated React with Laravel APIs using Axios for seamless client-server communication.
- ❖ Containerized the development environment using Docker and managed source code with Git.

GitHub: <https://github.com/headlet/E-Commerce>

Simple To-Do List

Personal Project

Technologies: PHP, MySQL, HTML5, CSS3, Bootstrap

Developed a lightweight task management application to organize daily activities.

Key Contributions

- ❖ Implemented complete CRUD functionality for task management.
- ❖ Developed task status management and validation features.
- ❖ Designed a clean relational database structure.
- ❖ Built a responsive and user-friendly interface.
